

Amendments to the Specification:

On the cover page, insert the following as the first sentence:

-- This application claims priority from PCT/GB2005/00230, filed January 21, 2005. --

On the cover page, prior to the first paragraph insert the following:

-- **Field of the Invention** --

On the cover page, amend the first paragraph as follows:

-- This invention relates to beverage dispensers and more especially relates to applications of the invention described in our co-pending PCT application No. PCT/GB2005/000201 of even date herewith, the whole disclosure of which is incorporated herein by way of reference thereto. --

On the cover page, prior to the second paragraph insert the following:

-- **Background of the Invention** --

Amend the last paragraph on numbered page 1 as follows:

-- It is further seen as a disadvantage that current systems are operating at their maximum capacity to dispense juice concentrate at the viscosity of current concentration ratios. The lower the concentrate ratio, the higher the proportion of water it contains so, if a higher viscosity, and therefore higher concentration, fluid can be pumped some of the shipping costs associated with the water component of the concentrate can be saved. Additionally the higher the concentrate ~~ratio~~ ratio, the

greater the number of diluted beverages that can be produced from the same sized reservoir. —

Prior to the second paragraph on numbered page 2 insert the following:

-- **Summary of the Invention** --

Between the second and third paragraphs on numbered page 9, insert the following:

-- **Brief Description of the Drawings**

Between the sixth and seventh paragraphs on numbered page 10, insert the following:

-- **Detailed Description** --
